

Lumens * and Globus

Cambridge SOW *

CCC governance structure sketched out but not operating yet. Access etc. will be different

Mehmet starts breakout rooms for issues from office hours

"Angers on users' pulses"

Jamie says this is going well. Ideal new user experience

Does Crill give CPU data

General agreement on using Arbiter. Would be nice if system could email user. (Arbiter does this by default) It is a heavy lift to implement, though. Ongoing user education. Folks want to behave correctly. Hard limits can be tough.

Green rows in spreadsheet are low-hanging fruit. Making RAM a schedulable resource will help Jamie's OOM problem.

$$\text{Max Job Count} = 10,000,000$$

QoS configurations - protect people from running jobs unintended

If someone has an extraordinary request we need to be able to service those.

Let's move the green ones to a spark sheet in the book.

Add them to wiki regarding "job waiting on resources." "Why leading"

Test Cluster

Jamie doesn't know how accurate "now at 100% utilization" is. Ganglia may not be accurate.

Some concern about repurposing existing hardware. Is there a way to do it without permanent reassignment?

Hello
